DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Ring (US 6,684,151 B1). Ring discloses a control device 10, schematically identified as a microcomputer inherently including a storage medium, programmable for use in a method as specified in claims 9 and 10. Claims 9 and 10 do not require that the storage medium and/or device actually be programmed to carry out the method steps.

Allowable Subject Matter

Claims 1, 3 and 5-7 are allowed.

Response to Arguments

Applicant's arguments filed March 1, 2005 have been fully considered but they are not persuasive insofar as they apply to the above grounds of rejection. Claims 9 and 10 fail to distinguish over the prior art for the reasons set forth above.

Applicant's arguments with respect to claim 7 have been fully considered and are persuasive in view of information concerning a vibe function in the article published by the

Application/Control Number: 10/801,305

Art Unit: 3747

Society of Automotive Engineers, which tends to show that the claimed "vibe function" is inherently different from the mathematical model used by the control device of Ring. The rejection of claim 7 has been withdrawn.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
